BandTel
Global SIP Trunking Leader

TotalView

Online Accounting & Reporting Management System

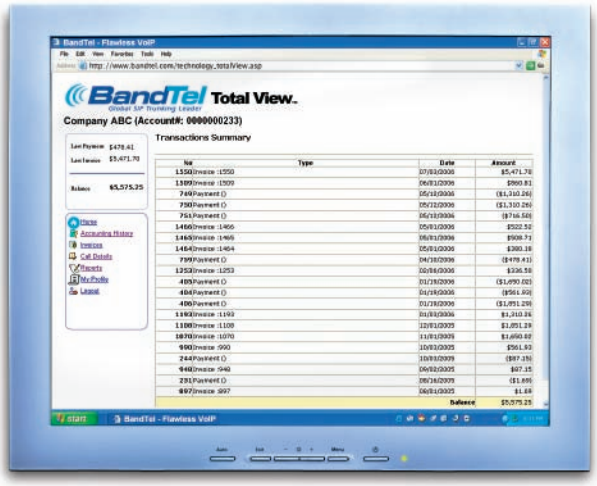
Our web-based call analysis portal is designed to give enterprise users access to in-depth, call traffic information. Customers can easily create Call Detail Reports to analyze their telecommunications budget. Resellers can also use TotalView to access their customers' call history and paid invoices; this provides them with an online compensation/revenue management system.

This powerful online Reporting & Account Management system enables customers to see real-time activity on:

- **All Calls**
- **Call Completion Ratios**
- **Minute Usage**
- **Worldwide Regional Destinations**
- **Account Billing**

Real-Time Call Activity

This is an enhanced service of VoIP that TDM cannot offer.



Accounting History

Designed for a multi-tier channel where Distributors, Resellers, and End-Users have online access to information.

Completed Call Percentage

View call-completion ratios to measure the effectiveness of the BandTel network.
